# What the NCD Survey Measures

*Introduction*

Under each of the eight quality characterisitics that NCD measures there is a list of 3-7 categories. These are the aspects of each factor that the survey investigates. You may want to consider each category in your current minimum factor and determine where you will apply your energies toward health.

Use the QuickFind numbers listed below for more information on each quality characteristic. Simply log on to CoachNet (www.CoachNet.org) and insert the number in the QuickFind box.

*Using the Information*

This information is *not* for automatic distribution to churches with the Survey results. It should be used to

- facilitate discussion during the analysis phase to determine key issues affecting the Minimum Factor
- help situations where churches want to deconstruct (pull apart) the questionnaire
- work with pastoral staff and the implementation team during the planning phase to ensure key issues have been considered

**1. Empowering Leadership** CompuCoach QuickFind CC50
